TCGRx Launches Automatic Vial Filler at NACDS Conference

POWERS LAKE, Wis., August 24, 2010 – TCGRx (TCG) announces the launch of the new, compact AVF-Series™ Automatic Vial Filler, which will be presented at the NACDS Pharmacy & Technology Conference, August 28 - 31, in San Diego, CA.

“The AVF-Series is a continuation of TCG helping pharmacies do more with less.” TCGRx CEO Duane Chudy said. “This versatile machine automates the top 30-40% of high moving oral solid medication, can be expanded to hold more medications, is easy to site due to compact design, and connects to TCG’s retail pharmacy drug management system, Beacon™, for a totally integrated pharmacy experience in which everything just works.”

With its unique design, AVF reduces fill times by automatically pre-counting and pre-staging prescriptions. This allows AVF to get ahead of workflow, letting the pharmacy staff focus on customer service.

AVF’s touch screen and software is intuitive and user-friendly. It easily navigates the user through the dispense process and keeps accurate inventory of the medications within the canisters. The software streamlines the process of filling a partial prescription and automatically creates a backorder for out of stock medication.

AVF’s accurate high speed dispensing has the capability to group up to 12 canisters in order to accommodate high volume or large-sized medications. Canisters can be calibrated at the pharmacy when medications are substituted or an NDC is changed to reduce canister turn-around time. AVF supports 64, 70, 76, or 82 of the fastest moving medications. The system allows for optional direct fill cells to eliminate cross-contamination for sensitive pills.

AVF has the flexibility to be placed almost anywhere in a pharmacy due to its compact footprint. At only 2.5(L) X 2.3(W) X 2.6(H) feet, AVF can be put on an existing countertop or on a cart that can store various size medication bottles, vials and lids. This allows the pharmacy the option to place the versatile AVF in an existing space instead of having to remove existing fixtures.

About TCGRX

TCGRx offers the most reliable pharmacy automation on the market and strategically develops customized technology solutions backed by decades of experience. Our staff designs and integrates automation into every aspect of our packaging devices, workflow software, and other individual products to improve the overall process in your pharmacy. TCGRx is dedicated to providing superior customer service and support by offering the most cost-effective methods to give pharmacies safe, efficient, and accurate solutions.

TCGRx is an industry leader in automation and designs services for hospital, long-term care, retail, and specialty pharmacy markets.
