TCGRx Announces Strategic Partnership with NetRx Partnership will give pharmacies additional resources to grow and diversify

POWERS LAKE, Wis., October 12, 2009 – TCGRx (TCG), an industry leader in automation and design services for pharmacy markets across the U.S., announced today a strategic partnership with NetRx a national network comprised of locally based, long-term care pharmacies with reputations for personalized service, high-quality products and cost-effective prices.

The strategic partnership aligns NetRx with TCG's expertise in pharmacy workflow solutions; designing automation integration into every aspect of packaging, workflow software and other individual products to improve the overall process in a pharmacy. TCG will round out their product offerings to members by providing packaging devices that support shorter "cycle" filling and remote dispensing.

"TCG provides pharmacies with flexible solutions for continuous improvement at an affordable price. Our strategic partnership with NetRx is the perfect answer to achieving these goals. Both companies' intentions are to improve the quality of pharmaceutical care delivered every day to the residents of sub-acute, skilled nursing, long-term care, assisted living and residential care facilities. We believe this is a necessary partnership for the independent pharmaceutical industry to be able to provide personalized service and high-quality products at cost-effective prices," said TCG CEO, Duane Chudy.

NetRx works closely with strategic partners to achieve excellence in pharmaceutical care. Their strategic partners are leading providers of products, services, and technologies supporting the healthcare industry.

"The strategic partnership with TCG will give NetRx more diversity to support its members, so they can continue to compete in the pharmaceutical industry. NetRx understands the competitive nature of the pharmaceutical industry, and we look for strategic partners who can work with us to give our members the ability to compete and provide excellence in pharmaceutical care. TCG's offering of customized technology solutions at an affordable price is a huge benefit to our members," said Ginny Roberts, Chief Operating Officer of NetRx.

About NetRxalliance

NetRx is a network for pharmacy services founded for pharmacists, by pharmacists to give independent pharmacies the power to compete. Their objective is to permit pharmacies to maintain their independence and business freedom while growing their business. Their goal is to continuously improve the quality of pharmaceutical care delivered every day to the residents of sub-acute, skilled nursing, long-term care, assisted living and residential care facilities serviced by NetRx member pharmacies throughout the United States. The result: the nursing home operators and administrators, nursing staff, physicians and most importantly, the residents of the facilities they service realize the highest level of quality and customer service at the most cost effective price.
