

## Software Quality Assurance Analyst

**Overview:** TCGRx is looking for a motivated self starter with a passion for testing software to join our growing team as a junior to mid-level software quality assurance analyst. This is a full time opportunity located between Kenosha and Lake Geneva at our Powers Lake, WI headquarters.

**Job responsibilities include, but are not limited to:**

- Developing, documenting and executing software test plans
- Documenting and tracking software defects and resolutions
- Assist with the development of internal SQA best practices
- Setup of test environment and test lab
- Advocate for the customer by ensuring requirements are met
- Present test results and recommend software improvements
- Occasional tier 1 phone support may be required
- Occasional overtime/after hours support may be required
- Occasional travel may be required

**Experience:** Applicant must meet the following requirements:

- BS Computer Science or equivalent degree/work experience
- 3 to 5 years of software testing experience
- Must be eligible to work within the U.S. without sponsorship
- Experience within the pharmacy or health care industry a strong plus
- Experience with MS SQL Serve a strong plus
- Experience testing integrated software/serial device-hardware solutions a strong plus

TCGRx is an industry leading manufacturer of pharmacy workflow and automation solutions. Local candidates preferred, relocation will not be offered as a term of employment. No third parties please.
